JOB OFFER

Position: Student Intern (m/f) in the field of “Image Processing” or “Computer Vision/Graphics"

The Video Analytics group at the R&D center in Darmstadt is executing applied research and technology transfer projects. The projects are mainly focused around new machine learning technologies and Internet of Things and provide the opportunity to drive ideas from conception to products, which are deployed in the field.

We are currently looking for student interns to support the work on exciting projects. This job requires good programming skills and familiarity with image processing, computer vision, computer graphics, or machine learning techniques. The candidate should have a solid interest in adapting state of the art computer vision and/or deep learning algorithms for high-performance applications and impacting industry by working on actual projects.

Tasks:

- Assisting in conceptualization, development and evaluation of prototypes and products
- Create content for new analytics modules in collaboration with development teams
- Optional: continuation as student assistant or with master thesis after internship

Requirements:

- Proficiency in at least one of the following languages: C++, C#, Matlab, Python
- Background in at least one of the following fields or related topics: computer vision, image processing, pattern recognition/machine learning, computer graphics
- Prior experience with OpenCV is a plus
- Interest in working in an international team
- Student status

Terms of employment:

- Preferred: full-time internship as part of your studies (only possible if your studies allow for this, i.e. compulsory internship)
- Alternatively or after internship: part-time student assistant position
- Optional: continuation with a master thesis in our labs

If you are interested and wish to work in an agile and open-minded international company, don’t miss the opportunity to send us your application, including CV and master transcript, via email.
