Heidelberg-based Getsafe is among Germany’s fastest growing and most innovative InsurTech startups. We are developing the first digital insurance that is fair by design and transfer the concept of multi-line insurers like Axa or Allianz into the digital age. Our strong growth is supported by Munich Re, one of the largest re-insurers of the world, as well as by strong and leading VC investors, including Rocket Internet, CommerzVentures and Partech. We are looking to further expand our team - Join the revolution!

Join us as:

Ruby Backend Developer (m/f)

YOUR TASKS

- Implementing new features on ongoing basis
- Continue to refine and improve the technical environment and the architecture to scale with the needs of our business
- Working together with Marketing and Product to define and implement their requirements
