

The power of connected minds

Software Developer in Digitalization (m/f/d)

We are the world's leading chemical company because we offer intelligent solutions for our customers and for a sustainable future. We connect and develop people with diverse talents all over the world. For you, this means a variety of ways to advance. Not only your performance but also your personality matter to us, without regard to gender, age, origin, sexual orientation, disability or belief. At BASF, careers develop from opportunities.

Ludwigshafen is the world's largest integrated chemical complex and home to BASF Group headquarters. Located in the heart of Europe's Rhine-Neckar metropolitan region, you will find this to be an attractive place for both work and leisure time.

What you can expect

From Ludwigshafen, our interdisciplinary team drives the digital transformation across Europe at three sites (Ludwigshafen, Schwarzheide and Antwerp). To achieve this, we use a broad spectrum of advanced methods drawn from the fields of agile software development, cloud computing, IoT, data science and machine learning, relying in the process on flat hierarchies.

- o In your role as a motivated software developer, you support digitalization projects from the identification of ideas through initial prototyping up to deployment and support the developed solutions in ongoing operations.
- o In addition, you conceptualize and implement a wide range of different IT solutions, such as intelligent assistance systems, web applications or microservices that play a key role in the digital transformation.
- o You work within an interdisciplinary, cross-unit network of experts and cooperate closely with our customers in the fields of production, infrastructure and logistics.
- o Moreover, you contribute your creativity in order to advance the digitalization of BASF through new technologies.

What we expect

- o You have a masters or equivalent degree in computer science, natural sciences, applied mathematics, engineering or a comparable discipline, in which you earned above-average marks.
- o Furthermore, you have solid skills in Python, R, Java, JavaScript, SQL or a comparable language and have experience with the development of complex software.
- o In addition, you have proficiency in the development of web applications, REST APIs and microservices. Experience with high-performance computing and cloud

computing (AWS, Azure) are favourable.

- o Experience with agile methods (scrum, kanban) and DevOps elements (e.g. unit tests, version control, CI/CD, container virtualization) is a plus.
- o Last but not least, you are in step with the latest digital trends, enjoy having an impact and want to achieve tangible results that are used directly by customers and partners.

We offer

- o Responsibility from day one in a challenging work environment and "on-the-job" training as part of a committed team.
- o Support of all employees by using different measures to ensure the balance of professional and private life.
- o Competitive compensation including attractive benefits as well as excellent career opportunities in an international company.
