

# **Master of Science (M.Sc.)**

## **„Business Informatics“**

University of Mannheim

– Module catalog –

**Appendix**

Academic Year

HWS 2024/ FSS 2025

Die folgenden Veranstaltungen wurden nach Veröffentlichung des Modulkatalogs dem Kursprogramm hinzugefügt.

## 1. Overview

### C. Specialization Courses

| Module no. | Name of Module         | Offered | Language | ECTS | Page |
|------------|------------------------|---------|----------|------|------|
| IE 650     | Knowledge Graphs       | HWS     | E        | 6    | 3    |
| IE 695     | Reinforcement Learning | HWS     | E        | 6    | 6    |

## 2. Detailed descriptions

### C. Specialization Courses

| IE 650                                    | Knowledge Graphs  |
|---|---|
| Form of module                            | Lecture   |
| Type of module                            | Specialization course   |
| Level                                     | Master  |
| ECTS                                      | 6   |
| Workload                                  | Hours per semester present at university: 56 h (4 SWS)  |
|   | Self-study: 124 h per semester <ul style="list-style-type: none"> <li>• 82 h: pre and post lecture studying and revision</li> <li>• 42 h: examination preparation</li> </ul>  |
| Prerequisites                             | Java or Python programming skills   |
| Aim of module                             | <ul style="list-style-type: none"> <li>• The Role of knowledge graphs in the AI landscape</li> <li>• Semantic Web and its representation languages</li> <li>• Labeled property graphs</li> <li>• Query languages for knowledge graphs</li> <li>• Knowledge modeling and ontologies</li> <li>• Logical reasoning with knowledge graphs</li> <li>• Machine learning with knowledge graphs and knowledge graph embeddings</li> </ul> |
| Learning outcomes and qualification goals | Expertise:<br><br>The participants of this course learn about principles and applications of knowledge graphs. They become familiar with their technical foundations such as representation and query languages, or logical inference. After taking this course, the students will be aware of the problems and benefits of knowledge graph technologies in the context of tasks such as  |

|            |  |
|------------|--|
|            | <p>knowledge management, information search and data integration, and they will be capable of judging the applicability of these technologies for addressing practical challenges.</p> <p>(MK1, MK2)</p>   |
|            | <p>Methodological competence:</p> <p>The participants learn how to design and implement AI systems based on knowledge graphs. They are able to use standardized modeling languages for building knowledge representations, and to query these models by means of languages such as SPARQL.</p> <p>(MF3)</p>  |
|            | <p>Personal competence:</p> <p>By jointly building a knowledge graph-based application, the students learn how to effectively work in teams. They improve upon their presentation skills by showing the outcomes of their projects to the other participants of the course.</p> <p>(MKO1, MKO3)</p>  |
| Media      | Lecture slides and exercise sheets will be available online  |
| Literature | <ul style="list-style-type: none"> <li>• Pascal Hitzler, Markus Krötzsch and Sebastian Rudolph, Foundations of Semantic Web Technologies, Chapman &amp; Hall/CRC, 2009</li> <li>• Allemang and Hendler (2008): Semantic Web for the Working Ontologist. Verlag Morgan Kaufmann.</li> <li>• Antoniou and van Harmelen (2004): A Semantic Web Primer. MIT Press.</li> <li>• Fensel et al. (2020): Knowledge Graphs: Methodology, Tools and Selected Use Cases. Springer.</li> <li>• Kerjwal et al. (2021): Knowledge Graphs: Fundamentals, Techniques, and Applications. MIT Press.</li> </ul> |

|                                       |  |
|---------------------------------------|--|
| Methods                               | The course participants will take part in theoretical and practical exercises, the solutions of which are discussed in the tutorials. At the end of the course, they get the opportunity to apply their knowledge in a team project. Each student team will design and implement a semantic web application, and subsequently present the results to the other students. Besides the exercises, regular presentations including references to relevant course materials and recommended readings will be given by the lecturer. The lecturer as well as the tutors offer individual help and consulting to the participants of the course. |
| Form of assessment                    | Written examination  |
| Admission requirements for assessment | Project report and oral presentation   |
| Duration of assessment                | 60 minutes   |
| Language                              | English  |
| Offering                              | Fall semester  |
| Lecturer                              | Dr. Sven Hertling  |
| Person in charge                      | Prof. Dr. Heiko Paulheim   |
| Duration of module                    | 1 semester   |
| Further modules                       | -  |
| Range of application                  | M.Sc. Wirtschaftsinformatik, M.Sc. Mannheim Master in Data Science, M.Sc Mannheim Master in Social Data Science, Lehramt Informatik  |
| Semester                              | 1 <sup>st</sup> /2 <sup>nd</sup> /3 <sup>rd</sup> semester   |

| IE 695                                    | Reinforcement Learning  |
|---|---|
| Form of module                            | Lecture with Exercise (partially online)  |
| Type of module                            | Specialization Course   |
| Level                                     | Master  |
| ECTS                                      | 6   |
| Workload                                  | Hours per semester present: 56 (4 SWS)  |
|   | Self-study: 98h (70h lectures/exercises, 28h exam preparation)  |
| Prerequisites                             | Machine Learning / Computer Vision /Generative Computer Vision Models course, theoretical and practical knowledge of neural networks  |
| Aim of module                             | <ul style="list-style-type: none"> <li>- Basic concepts of reinforcement learning: MDP, policies, on-policy, off-policy learning</li> <li>- Classical tabular reinforcement learning, DP, Policy Iteration, Q-Learning, SARSA, Monte-Carlo methods</li> <li>- Function approximation for reinforcement learning</li> <li>- Policy gradient methods</li> </ul> |
| Learning outcomes and qualification goals | <p>Expertise:</p> <p>After the course students will understand classical concepts of reinforcement learning as well as state of the art algorithms.</p>   |
|   | <p>Methodological competence:</p> <p>The students are able to understand and customize popular reinforcement learning algorithms, choose the right setting for their problem and train agents to perform well in environments with which they interact.</p>   |

|                                       |   |
|---------------------------------------|---|
|                                       | <p>Personal competence:</p> <p>The course trains abstract thinking and the ability to formally model application scenarios. By solving assigned exercises independently, the transfer of the learned material to related questions is promoted.</p> |
| Media                                 | Exercise sheets and lecture slides available online, blackboard   |
| Literature                            | - Sutton & Barto: Reinforcement learning: an introduction, 2018   |
| Methods                               | Lecture, exercises every two weeks, book studies  |
| Form of assessment                    | Written or oral examination   |
| Admission requirements for assessment | -   |
| Duration of assessment                | Written: 90 min. Oral: 25 min.  |
| Language                              | English   |
| Offering                              | HWS   |
| Lecturer                              | Prof. Dr.-Ing. Margret Keuper   |
| Person in charge                      | Prof. Dr.-Ing. Margret Keuper   |
| Duration of module                    | 1 Semester  |
| Further modules                       |   |
| Range of application                  | M. Sc. Business Informatics, M. Sc. Data Science, Lehramt Informatik  |
| Semester                              | 1./2./3. Semester   |
