

**IDV 402 Designing the Just Transition:
Ways to incorporate ecofeminism and climate justice activism into your career**

Climate change will impact your future whether you like it or not. It will happen by design or by disaster. What knowledge and skills do you need to become an effective change-maker in your profession to help manage the just transition? Centered around the collection of texts in Ayana Elizabeth Johnson and Katharine K. Wilkinson's *All We Can Save. Truth, Courage, and Solutions for the Climate Crisis* (2020) this intensive three-day seminar aims to inspire students to take charge of their future and will equip them with the tools to sharpen their arguments and become effective "inside climate activists." Whether you view yourself as a future teacher, project manager, start-up entrepreneur or HR professional (or whatever Uni Mannheim graduates like to do) this seminar will help you get started on designing your role in the just transition.
